## FOREWORD

---

The Leadership and Organizational Change Technical Area (LOCTA) of the Manpower and Personnel Research Division, U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) conducts research on leadership, personnel, and organizational change. As part of this program, longitudinal research has been conducted on the attitudes, career experiences, and career decisions of company-grade officers in the U.S. Army. The major component of this research has been an annual survey that was administered from 1988 through 1992.

This survey, the Longitudinal Research on Officer Careers (LROC) Survey, focused on personal, family, and career issues, including questions on demographics, command assignments, career development and support, mentors, career orientations and intentions, job satisfaction, Army life expectations, Army versus civilian life, and spouse/family issues.

The LROC database contains data files for each year of the survey with approximately 5,000 respondents for each year. A total of 928 officers have responded to all 4 years of the survey and constitute the longitudinal respondents. Respondents are company-grade officers commissioned from 1980 through 1990. Research Product 93-10 describes the database and provides descriptive statistics for each year of the project.

The 4-year period of the LROC Survey has been a period of major change for the Army. Troops were deployed for Operation Desert Shield/Storm, and Congress mandated significant reductions in the size of the force. The data from the LROC Survey provide a unique opportunity to examine changes in the attitudes, career experiences, and perceptions of officers who have been in the Army during this time of change. In keeping with the mission of LOCTA, this information can also inform policymakers on the factors influencing officer career decisions, retention, and recruitment. Results from the LROC Surveys have been briefed to a number of Directorates and Commands throughout the Army since 1989. Information on the 4-year trends was briefed to the Chief of Staff, U.S. Army, early in 1993.

LONGITUDINAL RESEARCH ON OFFICER CAREERS:  
VOLUME 2. CODEBOOK FOR THE 1988 SURVEY

EXECUTIVE SUMMARY

---

**Requirement:**

The Longitudinal Research on Officer Careers (LROC) tracks the changes in attitudes and career experiences of company-grade officers over time; identifies the individual, organizational, psychosocial, and family factors that influence officer career decisions; and investigates the effects of policy change and world events on the attitudes and career decisions of officers.

**Procedure:**

In the fall/winter of each year, beginning in 1988, the LROC Survey was mailed to a stratified random sample of company-grade officers commissioned from 1980 through the year preceding the survey year. The sampling plan called for stratification by gender, source of commission, and year of commissioning. Survey content centered on the attitudes, career experiences, satisfaction, and family experiences of officers from commissioning through mid-career (approximately 10 years). To obtain the maximum number of longitudinal respondents, officers were kept in the sample and resurveyed every year of the research unless they left the Army.

**Findings:**

The LROC survey databases contain the results of the 1988, 1989, 1990, and 1992 surveys. Approximately 5,000 officers responded each year. Response rates were 63% for 1988; 51% for 1989; 52% for 1990; and 47% for 1992. Overall, the respondents are fairly representative of the total population of company-grade officers. However, some subgroups are underrepresented. Tables included in the technical manual, Volume 1, provide information to guide researchers when subgroup analyses are of interest. Volumes 2 to 5, codebooks for each survey, provide the questions, variable names, response labels and codes, and descriptive statistics for the 1988-1992 databases, respectively. Volumes 2 to 5 also include a cross-reference of survey questions over the 4 years.

### **Utilization of Findings:**

The LROC database provides a longitudinal tracking of Army officers over a crucial 4-year period. Beginning in 1989, results of the LROC surveys have been briefed to Army policy-makers providing information on branching issues; the impact of downsizing on the attitudes, career experiences, and career intentions of officers; and on attitudes about women in combat, to name a few. Combined with other personnel and survey databases, the LROC data provide a unique opportunity to investigate the actual trends and changes in attitudes over this 4-year period of change in the world and in the U.S. Army.

REPLY TO  
ATTENTION OF

PERI-RP

Dear Fellow Officer:

The Army Research Institute (ARI) has been asked to provide information on career and family related issues important to junior officers commissioned in the 1980's. You are one of the officers randomly selected to assist in this important effort.

The information obtained from this survey will be used to guide decisions about personnel policies and programs affecting all officers. Therefore, please provide thoughtful, candid responses. The confidentiality of your responses will be protected.

Request that you complete and return the enclosed questionnaire as soon as possible. Thank you for your cooperation and support.

Sincerely,

A handwritten signature in black ink, appearing to read "Allen K. Ono".

## 1988 SURVEY: LONGITUDINAL RESEARCH ON OFFICER CAREERS

The U.S. Army Research Institute (ARI) is collecting data from Army officers on issues pertaining to their careers and their families. The information we obtain will be used to help policy planners improve the preparation, performance and retention of officers. Follow-up surveys may be administered in the future to examine changes over time.

### PRIVACY ACT STATEMENT

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information collected.

The Department of the Army may collect the information requested in this survey under the authority of 10 United States Code 137. Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in this survey will be used solely for research purposes. Social Security Numbers and names are requested only for tracking and control purposes.

Your responses will be held in strict confidence. No one outside the research team will have access to individual data.

## MARKING DIRECTIONS

- Use only a No. 2 black lead pencil.
